

FUNCTIONAL. CUSTOM-MADE. ANTI-BACTERIAL.

HEALTHCARE SOLUTIONS FROM LISTA

SMART ASSISTANCE: LISTA SOLUTIONS FOR HEALTH- CARE AND MEDICINE

Anyone working in the medical field will be well aware of the high demands of this sector. Consistently excellent performance is an absolute necessity both personally and professionally, whether in hospitals, medical practices or laboratory settings. The bar is set high when it comes to efficiency and hygiene. It's just as well that there are strong partners like LISTA: our Healthcare Solutions offer customers from the pharmaceutical, healthcare and medical sectors sophisticated solutions for efficient and hygienic logistics, from storage to the patient area. In particular, we offer needs-based equipment options and surfaces with an anti-bacterial coating.

+ A end-to-end system for all applications

- optimally coordinated modules, from drawer cabinets and medical device cabinets to storage lifts
- myriad combination and configuration options: stationary vs. mobile versions, various locking solutions, worktops also in e.g. stainless steel with a customer-specific finish, etc.
- uniform look and feel for efficient working
- flexibly extendible and adaptable to future needs

+ Industry-specific functionality

- anti-bacterial coating to protect against bacteria and fungi
- suitable for use with ISO modular baskets
- easy to clean
- easy handling thanks to quiet drawers inc. partition material and furniture castors
- extensive accessories for the optimal arrangement of trolleys, storage facilities and workstations

+ Special and custom solutions for specific requirements

- modification and adaptation options in terms of equipment, dimensions and much more
- customised solutions and applications

+ Comprehensive expertise in guidance and planning

- LISTA partners in your area
- longstanding product and industry expertise
- modern planning tools

LISTA HEALTHCARE SOLUTIONS LEADERS IN HOSPITAL, SURGERY, LABORATORY AND INDUSTRY SETTINGS

LISTA's solutions for the healthcare sector are based on the modular LISTA system, which allows components to be configured and combined in a plethora of different ways. They comprise modules such as the drawer cabinet, shelving, tables, storage lift systems and sector-specific solutions like the medical device cabinet. Thanks to its modular structure, the LISTA system can be

flexibly adapted to individual spaces and requirements. At the same time, our Healthcare Solutions have special features that fully meet the needs of the sector. For instance, these include the effortless integration of ISO modular baskets and, in particular, the antibacterial surface coating.

+ End-to-end complete system

+ Myriad configuration options

+ Wide range of accessories

+ Free choice of colours

+ Individual locking solutions

+ 10-year guarantee, including for subsequent deliveries

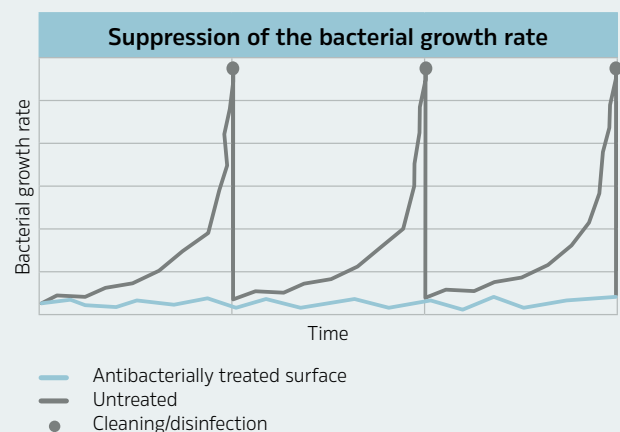

Antibacterial surface coating Germs and the like stand no chance

Germs, especially multi-resistant pathogens, are among the greatest sources of danger in healthcare. In Switzerland alone, hundreds of thousands of people become infected in hospital every year. Contact infections do not occur only due to person-to-person contagion, but also come via objects. Antibacterial coatings make a significant contribution towards preventing the spread of infection by rendering pathogens like bacteria and fungi harmless.

LISTA Healthcare Solutions come with an anti-bacterial silver-ion coating that kills a wide range of dangerous pathogens, thus contributing towards effective protection against infection. The ionised finish enables long-lasting effectiveness and alters neither the mechanical properties nor the appearance of the coated surfaces. What this means: You get a LISTA product of the usual high quality, with a lasting protective effect on top.

The silver ion finds its way to the bacteria via the moisture and deactivates it.

MAKES HARD WORK EASIER

THE LISTA MEDICAL DEVICE CABINET

With sector-specific standard equipment and a plethora of additional equipment options, the LISTA medical device cabinet helps to make hospital processes safer and more efficient. This takes some of the pressure off hospital staff. Various locking solutions and the antibacterial coating enable reliable protection.

The contents are visible from the outside and easy to reach,
thanks to doors with large viewing windows and a 270° opening angle

Compatible with ISO modular baskets in all versions
grey/transparent, with lengthwise and crosswise dividers and cardholders – for clear storage of medication and materials

Flexible 3-in-1 modular storage
Horizontal, inclined or extended and tilted, as required, optionally with a stop function

Safe and ergonomic handling for different body heights
thanks to four end-to-end handles integrated into the housing

Hygienic and easy to clean
thanks to the flat design and scratch-resistant powder coating

Easy and safe to manoeuvre
on four 75 mm-diameter swivel castors, two of which have a locking brake. Illustration incl. optional ESD castors.

Antibacterial silver-ion coating
for effective combating of bacteria and fungi

Protection and softening of impact in case of collisions
with bump stops at the four corners

ESD-specification castors
anti-static and quiet thanks to 100 mm diameter design

Various locking solutions

RFID Lock

particularly secure radio locking with RFID badge, or with numerical code

CODE Lock

electrical locking with numerical code

KEY Lock

classic locking with a key, available as keyed alike, separately lockable or a master key system

Compatible with conventional ISO modular baskets measuring
400×600 mm with heights of 50, 100 and 200 mm

Free choice of colours

12 standard colours to choose from for the doors, with any other colour or colour combination (housing/doors) possible at a surcharge, even with an antibacterial coating

SAVES SPACE AND ENSURES SECURITY THE LISTA LIFT S

Taking up less than 3m² floor space, the LISTA Lift S represents an efficient and ergonomic storage solution for medication and more – all while maintaining optimum security. The space-saving system reliably assists compact, clear storage of large quantities of material. Short transport distances and easy access enable rapid removal and demonstrably reduce the error rate.

Optimum use of space

up to 25,000 kg cargo load at only 1.6 m deep and up to 7 m high

Ease of use

thanks to the integrated touchscreen user interface and visual aids such as LED strips or laser pointers

Outstanding safety features

Self-centering, steel-reinforced belt system, acknowledge button, emergency off switch and more

Comprehensive support accessories

for custom division and adaptation based on the stored goods

Individual access control system

for additional protection against unauthorised access and even better inventory control

TAILORED TO YOUR NEEDS LISTA WORKTABLES AND WORKTOPS

LISTA worktables come in different dimensions and designs. Frames and countertops can be freely combined, thus allowing a plethora of custom solutions. Suitable castors transform stationary tables into mobile workstations. Height-adjustable frames are also available for extra ergonomic comfort.

Worktops in comparison

Resin top

- 0.8 mm resin coating
- suitable for laboratories and examination rooms with normal requirements
- easy to clean
- resistant to chemicals and solvents

Eterlux top

- 3 mm resin coating
- suitable for laboratories and examination rooms with more exacting requirements
- easy to clean
- slightly impact-resistant
- resistant to chemicals and solvents

Chrome steel top

- fully enclosed top with chrome steel coating
- suitable for environments with the very highest requirements
 - hygiene
 - resistance to chemicals, solvents and acids

Cast resin top

- seamless cast resin coating
- prevents the formation of bacterial colonies
- suitable for environments with the very highest requirements
 - hygiene
 - impact- and scratch-resistant
 - resistance to chemicals, solvents and acids

LISTA SOLUTIONS FOR MEDICAL PRACTICES AND HOSPITALS, LABORATORIES AND INDUSTRIAL COMPANIES WORLDWIDE

Healthcare Solutions from LISTA are used all over the world: well-known customers and facilities in the healthcare, medical and pharmaceutical sector rely on a day-to-day basis on industry-specific solutions from one of the world's leading systems for storage and operating facilities.

If you're interested in our products and services, we'd be happy to help. We draw upon our many years of industry expertise to provide you with targeted advice and planning guidance, all the way from installation through to after-sales support.
